Skills

- Data Analytics:
- Machine Learning
 - Deep Learning
 - Python
 - SQL
- Business and Management:
- Industrial Engineering
 - Lean Six Sigma
 - Operations Management
 - Business Transformation
- Software and Tools:
- Gen AI tools (Cursor etc.)
 - Power BI
 - Tableau
 - Minitab
 - Excel
 - AutoCAD
 - Microsoft Visio
 - Microsoft Project

Strategic and forward-thinking senior leader with a passion for leveraging data analytics to drive business transformation and innovation. Backed by Six Sigma certification and deep expertise in industrial engineering, I excel at leading cross-functional teams, streamlining operations, and delivering measurable value across complex organizations. Known for turning insights into action, I thrive on guiding teams toward impactful, data-driven outcomes.

Work History

2022-08 – 2025-04	Sr. Manager, Supply Chain Engineering JCPenney, Reno, NV - Developed an internal quality management system with a focus on maintaining training records - Drove process efficiency across multiple operational areas including inventory management - Successfully led a cross-functional team in fiscal 2023 - 2024, resulting in total cost avoidance exceeding \$1M - Successfully spearheaded project management initiative for two major capital projects - Created real-time data visualizations to enhance floor operations and actively advancing the development of an end-to-end data control tower for the Reno distribution center
2022-03 – 2022-06	Lean Six Sigma Black Belt Petco, Reno, NV - Initiated the Data Control Tower project, emphasizing the utilization of real-time data to enhance supply chain optimization - Cultivated a culture of Continuous Improvement (CI) by implementing Kaizen blitz methodologies, encompassing 6S, Root Cause analysis, and Lean Flow analysis, to drive data-driven improvements
2019-10 – 2022-02	Logistics/ Value Add Engineer III Arrow Electronics, Reno, NV - Streamlined employee training record maintenance process using lean principles - Achieved a remarkable 31% increase in productivity within the manual order consolidation area by implementing the DMAIC approach - Developed labor models and associated business intelligence tools to maximize labor utilization and drive productivity enhancements - Conducted a comprehensive analysis of Virtual Reality's potential applications in training - Spearheaded the continuous improvement program with a core focus on fostering a Culture of Continuous Process Improvement (CPI)

- Identified and prioritized key opportunities by thoroughly mapping the value stream for the entire end-to-end warehouse processes
- Realized savings of \$2 million through leadership and active participation in numerous Kaizen events
- Significantly increased the service level for the Guadalajara warehouse by 40% through the application of lean principles and data-driven approaches

2018-08 -
2019-09

Logistics/ Value Add Engineer II – Project Management

Arrow Electronics Inc, Reno, NV

- Managed quality assurance program, including on-site evaluations, internal audits and customer surveys
- Implemented a CPI DMAIC approach to improve quality
- Reduced wrong parts DPM by over 70% and overall DPM by 25%
- Minimized CoPQ by saving \$800K in inventory costs and more than \$350K in processing costs

2015-09 -
2018-07

Logistics/ Value Add Engineer II – Continuous Improvement

Arrow Electronics Inc, Reno, NV

- Saved \$200K by reducing storing cycle time
- Streamlined product flow operations and achieved cost avoidance of \$300K
- Led 5S program with innovative recognition program
- Won internal competition twice for kaizen projects

2013-12 -
2015-09

Engineering Supervisor

Electronics Evolution Technologies, Inc, Reno, NV

- Led, directed and supervised team of 5 engineers to develop, test, modify and deploy solutions to technical problems
- Implemented 5 continuous improvement projects resulting in savings more than \$300K
- Led development meetings for high-value customers and business operations updates
- Coordinated activities with other units of organizations to develop cross-functional strategic plans to enhance company performance

2011-07 -
2013-11

Manufacturing/Process Engineer

Electronics Evolution Technologies, Inc, Reno, NV

- Developed manufacturing processes that were robust yet simple to perform
- Saved \$100k by identifying floor inefficiencies and improving product flow
- Met weekly with Operations Director to discuss project implementations and alleviate any issues

2008-01 -
2011-06

Manufacturing/Process Engineer

Smart Electronics and Assembly, Inc, Anaheim, CA

- Minimized labor costs by 70% and improved lead time by 50% using theory of constraints
- Developed robust processes using DMAIC methodology

2006-01 -
2007-08

Research Intern

Hidden Valley Electronics, HVE, Binghamton, NY

- Developed predictive model using Minitab and SAS resulting in cost avoidance of \$50K and cycle time by 20%
- Performed comparative quantitative analysis to select best soldering iron

Education

2005-08 -
2007-12

Master of Science: Industrial Engineering

State University of New York - Binghamton, NY

2000-06 -
2004-05

Bachelor of Science: Mechanical Engineering

University of Mumbai (Mumbai) - Mumbai, India

Certifications

Machine Learning Specialization (DeepLearning.AI)

SQL Beginner to Advanced for Data Professionals

Six Sigma Black Belt Certification

Six Sigma Green Belt Certification

Interdisciplinary Concentration in Electronics Packaging

Lean Manufacturing Training
